Your Name & Phone Number Here! Medical Risk Analysis

Overview

The following Risk Factors have been analyzed to calculate a Medical Risk Index for Sample Patient. The overall Medical Risk Index is a compilation of each category. Intervention recommendations are based on an analysis of each risk profile.

Risk Profile			
Body Composition: 35.5%	Low Risk	Moderate Risk	High Risk
BMI: 26.47			
Systolic BP: 140.00 mmhg			
Diastolic BP: 90.00 mmhg			
Glucose: 120.00 mg/dl			
Cholesterol: 220.00 mg/dl			
Triglycerides: 300.00 mg/dl			
A/G Ratio: 1.25			
HDL: 40.00 mg/dl			
Cho/Hdl ratio: 5.50			
Exercise Profile: High Risk			
Nutrition Profile: High Risk			
Obesity Profile: High Risk			
Overall Risk	Low Risk	Moderate Risk	High Risk
Obesity Risk Index:
